PROFESSIONAL SUMMARY

- Detail-oriented **Salesforce QA Analyst / Integration Tester** with **5+ years of QA experience** in **Salesforce implementations, integration testing, and financial services platforms**.
- Hands-on experience testing **Salesforce Financial Services Cloud (FSC)**, **Sales Cloud**, **Experience Cloud**, and **nCino-aligned lending workflows** in enterprise banking environments.
- Strong expertise in **functional, regression, integration, end-to-end, and UAT testing** across Salesforce and integrated systems.
- Experienced in validating **Leads, Opportunities, Accounts, Contacts, CRM workflows, Flows, Validation Rules, Lightning pages, custom objects, profiles, permission sets, and access controls**.
- Skilled in **API testing, ETL/data migration validation, SQL/SOQL backend validation, defect management, and Agile QA delivery**.

CORE SKILLS & TECHNOLOGIES

- Salesforce QA Testing (Sales Cloud, Financial Service Cloud, Experience Cloud, nCino)
- Financial Services Cloud (FSC) Testing
- Salesforce Administration Testing (Profiles, Roles, Permissions, Workflows, Validation Rules)
- Salesforce Implementation and Release Validation
- Functional, Regression, Integration, E2E, and UAT Testing
- Salesforce CRM Workflow Testing
- Leads, Opportunities, Accounts, Contacts, and Custom Object Validation
- Salesforce Security Fundamentals: Profiles, Permission Sets, Roles, Access Controls
- Flows, Validation Rules, Lightning Pages, Reports, Dashboards
- API Testing, ETL Testing, Data Migration, Field Mapping Validation
- SQL/SOQL Data Validation
- Jira, HP ALM, TestRail, Postman
- Agile / Scrum / SDLC / STLC
- Defect Tracking and Cross-functional Collaboration

TECHNICAL SKILLS

- **Salesforce CRM Platforms:** Sales Cloud, Financial Service Cloud, Experience Cloud, nCino
- **Salesforce Validation**: Leads, Opportunities, Accounts, Contacts, Custom Objects, Flows, Validation Rules, Lightning Pages, Profiles, Roles, Permission Sets, Workflows
- **Integration Testing:** API testing, ETL validation, data migration testing, field mapping validation, data reconciliation, cross-system workflow validation
- **Testing Tools:** Jira, HP ALM, TestRail, Postman
- **Automation Tools:** Selenium WebDriver
- **Databases / Querying**: SQL Server, SQL, SOQL
- **CI/CD Tools:** Jenkins, GitHub Actions
- **Programming / Scripting:** Python
- **Methodologies:** Agile, Scrum, SDLC, STLC

.

EXPERIENCE

Salesforce CRM Analyst – QA Lead June 2021 - April 2025

Accenture (Client: Bank of America)
Project- loan process Customization

- Designed and executed detailed **test plans, test cases, and test scenarios** for Salesforce and enterprise financial-services applications.
- Performed **functional, regression, integration, end-to-end, and exploratory testing** across Salesforce releases and downstream systems.
- Executed testing for **Salesforce Financial Services Cloud (FSC), Sales Cloud, and Experience Cloud** workflows supporting banking and lending processes.
- Validated customer onboarding, loan-process customization, financial account workflows, and relationship-driven CRM processes in Salesforce.
- Tested core Salesforce objects and workflows, including **Leads, Opportunities, Accounts, Contacts, and custom objects.**
- Validated Salesforce Administration configurations including:
  - **Profiles, permission sets, and user roles**
  - **Validation rules, workflows, and flows**
  - **Reports, dashboards, and object relationships**
- Performed integration testing to validate data movement between Salesforce and external applications, including APIs, ETL pipelines, and downstream operational systems**.**
- Verified **field mappings, transformations, and system interactions** during integration and migration processes.
- Conducted **API testing using Postman** to validate service responses and end-to-end interactions across integrated systems.
- Executed **SQL/SOQL backend validation** to confirm data integrity, migration accuracy, and expected processing results.
- Ensured Salesforce configurations complied with **security fundamentals and access-control best practices**.
- Reviewed user stories and acceptance criteria to ensure **full test coverage** and traceability.
- Logged, tracked, and managed defects through resolution using **Jira** and maintained QA artifacts in test-management tools.
- Collaborated closely with **developers, Salesforce admins, product owners, and business teams** to support quality releases.
- Participated in **Agile ceremonies** including sprint planning, backlog grooming, sprint reviews, and retrospectives.
- Led a team of 7 QA analysts to support timely, quality-focused delivery across multiple releases.

Software Engineer – QA Analyst January 2019 - June 2021

Accenture (Client: Bank of America)

- Performed **end-to-end testing** of Salesforce CRM and Sales Cloud portals, integrations, and business workflows in a banking environment.
- Validated **customer onboarding, KYC, loan processing, and financial data integration** workflows across Salesforce and enterprise systems.
- Conducted **integration and ETL testing** to verify data migration, data synchronization, and system-to-system consistency.
- Performed **backend database validation using SQL** to ensure accurate processing and data integrity.
- Investigated defects using logs, test evidence, and database analysis, and partnered with technical teams to resolve issues.

- Supported **functional, regression, and release testing** across multiple environments.
- Collaborated with business stakeholders, developers, and Salesforce support teams to ensure quality delivery and requirement coverage.
- Participated across SDLC phases including requirement analysis, test preparation, execution, and release validation.

Associate Software Engineer - QA Tester **January 2017 - December 2018**
Accenture (Client: Bank of America)

- Supported **Salesforce functional and integration testing** across multiple environments and releases.
- Created and executed test cases for **Salesforce objects, workflows, validation rules, and data validation** activities.
- Participated in story analysis, sprint planning, requirement walkthroughs, and QA review sessions.
- Assisted senior QA leads with **regression testing**, release validation, and defect tracking.
- Documented test results and maintained QA artifacts to support audit, compliance, and traceability needs.
